

# Lexical Modeling of *Yamabuki*, (Japanese Kerria) in Classical Japanese Poetry

Hilofumi Yamamoto  
Tokyo Institute of Technology

- **Ide town** in Kyoto is famous for its appearance in classical Japanese poetry. (ca. 10th century; the *Heian* period)
- The **Ide -Frog -Kerria** combination is known as the **GOLDEN RATIO** of Classical Japanese Poetry.

- In addition, we discovered the hub node term *yahe* (eightfold) which plays a major role in connecting a topic word with other peripheral words but is not recorded in any poetic dictionaries.
